

Construction phasing

Construction on site is anticipated to commence Summer 2015 for a period of 12 months.

The key items you want us to consider during the construction phase include:

- Resident and business access and parking arrangements
- Working hours
- Noise and dust impacts
- Traffic management arrangements
- Phasing the works with Barratt Homes at Douglas Rd junction improvement to minimise disruption
- Contact details of Site Supervisor to address resident issues

We will provide more information on the above in due course.

We are keen to update you regularly about the scheme by email, particularly during the construction period. Please provide your name, home address and **email address** on the form available at this event, so that we can add you to our database for future correspondence.
